Business Development | Kelda Showers | 2018 - 2019

Snowboard Instructor | Castle Mountain Resort | 2017

Head Brewer | Canopy Beer | 2015 - 2017

PROFILE

A curiosity, the love of creating and seeking continued learning in the ever changing world tech has led me to software development. I'm a motivated individual with a diverse background, with this I bring a varied set of skills. Working across different sectors has strengthened my ability to adapt, pick up new skills, and fostered my aptitude and passion for learning. My career to date includes working independently, as a team member, a manager, and customer facing role. The variety of experience has given me the confidence to take on new challenges and responsibilities. As an individual, I'm looking to bring enthusiasm, ideas, creativity, and collaborative nature to any new role.

PROJECTS

Jaxun Weather Service

React app Javascript | React.js | Express.js | node.js | MUI

React.js weather app with the ability to search by location using a 3rd party API calls to an Express.js backend with a focus on clean design and functionality

- Solo project with a short time frame to deliver a full stack application using third party API.
- Opportunity to experiment and learn how to style with Material UI
- Solidify knowledge and learning using third party API and building an express back end to make the calls.

Servo Finder

SPA Javascript | Express | node | PostgreSQL | CSS | HTML

Group project building a single page app implementing Google Map API, seeded data in to a PostgreSQL database.

- Group project working over Zoom and Slack
- Trello board for planning and component assignment for efficient project and time management.
- Utilising Git and Github for project version control for tracking, managing changes and conflict resolution.

MotoShare

CRUD - [Demo](#) Javascript | Express | node | PostgreSQL | HTML | CSS

Full stack CRUD app, an instagram style app to share custom motorcycles.

- Allow users to create an account and sign in securing password by hashing.
- Building an Express backend using PostgreSQL to store data, including emails addresses and hashed passwords

Tic-Tac-Woah

Client side game - [Demo](#) Javascript | HTML | CSS

The most bodacios of games. A surfer theme two player tic-tac-toe game using vanilla Javascript.

- Using the DOM API
- Taking a simple game and turning it in to an eye catching and fun interactive experience using sounds and animation.
